-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 3 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. Claim 3, 11, 15, and 22, recites the limitation "up until the last time" in line 4 of claim. There is insufficient antecedent basis for this limitation in the claim. It is unclear what is meant by "up until the last time".

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hosoya et al. (US/5,144,929) in view of Toyota (JP56164864).

Hosoya discloses a knock control system that handles noise from the various cylinders interfering with the knock sensor. A noise determiner determines whether the knock determining signal for each cylinder is erroneous due to noise, and generates a noise determining signal if the knock determining signal is erroneous. A knock control inhibitor inhibits knock suppression control based on the knock determining signal on a

cylinder for which a noise determining signal is generated. (Abstract) Hosoya et al. discloses a learning device that sets the upper and lower thresholds (51, 52) of the noise band.

Toyota discloses prohibiting fuel inject during times knocking detection period. because of noise being made.

At the time of invention it would have been obvious to prevent fuel injection of other cylinders during periods of knock determination to prevent noise from effecting the knock detection in a cylinder.

Motivation would have been to improve the efficiency of the engine.
